Geological time is divided up into segments. This diagram shows those segments, and some of the animals and plants that lived in each time period. Colour in the time periods using different colours, starting with the beginning of time. Think how Britain might have looked during each segment of time. Then cut out the spiral along the thick black line, attach a thread to the top, and hang this Geological Timeline, spanning millions of years, from your ceiling.

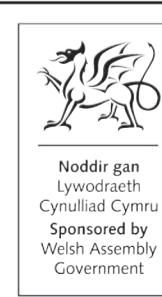

Mae amser Daearegol yn ymrannu'n segmentau. Mae'r diagram yma'n dangos y segmentau hyn, a rhai o'r anifeiliaid a'r planhigion oedd yn byw ym mhob cyfnod. Gan gychwyn gyda dechrau amser, lliwiwch y cyfnodau o amser gan ddefnyddio gwahanol liwiau.

Ystyriwch sut le oedd Prydain ym mhob segment o amser. Wedyn torrwch y droell ar hyd y llinell ddu, drwchus a chlymwch edau wrth ben y droell. Gallwch hongian eich Llinell Amser Daearegol, sy'n cwmpasu miliynau o flynyddoedd, o'ch nenfwd.
